INDUSTRY REVIEW

Cement Industry witnessed an increased demand of cement during the period and posted a growth of 16.95% in overall cement dispatches. Local sales volume remained at 36.17 million tons (2020: 30.59 million tons) during the period resulted a growth of 18.24%, whereas exports reached at 7.14 million tons (2020: 6.44 million tons) showing a growth of 10.79%.

The upward trend in industry volumes was mainly due to resumption of construction activities after COVID-19 Lock down situation. Government's particular focus on infrastructure projects under CPEC, Naya Pakistan Housing Scheme, provision of financing facility with low markup rates and business friendly initiatives particularly for construction industry were among the major steps to boost the economic activity that positively impacted the industry volumes.

SALES REVIEW

During the period under review, local sales of the company in terms of volume increased by 27.44% as compared to corresponding period last year. Increase in local sales volumes resulted in growth of revenue from local sales by 25.74% as compared to corresponding period. However, overall revenue of the company is picked up by 13.42% in comparison with same period last year. Your Company showed improved sales

performance as compared to corresponding period last year and successfully retained its market share in the South Region despite tough market conditions due to COVID-19 coupled with unprecedented monsoon rains in the province of Sindh during the period under review.

FINANCIAL REVIEW

A comparison of the financial results of the Company's performance for the nine months period ended March 31, 2021 with the same period last year is as under:

Particulars	March 31, 2021	March 31, 2020
1 articulars	Rupees in	thousands
Sales – net	1,743,722	1,537,447
Gross profit	250,867	99,011
Selling and Distribution Cost	65,816	83,176
Finance Cost	13,054	34,314
Profit/(Loss) before taxation	147,149	(58,459)
Profit/(Loss) after taxation	128,495	(67,963)
Earnings/(Loss) per share (Rupees)	1.29	(0.68)

Cost to Sales ratio has decreased to 85.61% during the period as compared to 93.56% in the corresponding period last year. The main reason of decrease in Cost to Sales ratio is due to management's focus on securing local sales business at better margins. In addition to this, decline in Cost of Sales is due to decrease in per unit cost of power, coal and other input costs during the period under review as compared to corresponding period.

Selling and distribution cost decline by 20.87% mainly due to low exports of clinker as compared to corresponding period. Finance cost is also decreased due to efficient utilization of resources and reduction in discount rate from 13.25% to 7.00% as compared to corresponding period.

FUTURE OUTLOOK

The monetary and fiscal measures taken by government has improved the macroeconomic indicators of the economy. Government's particular focus on infrastructure development and housing has resulted in higher domestic cement consumption and this trend is expected to continue in the foreseeable future. Higher cement demand should result in much needed stability in cement prices and therefore, higher revenues.

During the period under review, a consistent monetary policy rate was maintained by State Bank of Pakistan (SBP) at its current level of 7% as part of measures to mitigate the adverse impact of COVID-19 on Pakistan Economy and to ease liquidity. We expect that this step will result in overall improvement not only in the cement industry but also in the economy of the country.

Besides above, SBP has also recently introduced finance facility for construction/acquisition of homes at

reduced mark-up rates repayable in affordable monthly instalments which shall further boost the construction activities in the Country and spur the demand of cement.

17 FAIR VALUE MEASUREMENTS

The carrying values of all financial assets and liabilities reflected in the condensed interim consolidated financial statements approximate their fair values. Fair value is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included within level 1 that are observable for the asset either directly or derived from prices.

Level 3: inputs for the asset or liability that are not based on observable market data (unadjusted) inputs.

The fair value of all other assets and liabilities is estimated to approximate their carrying value.
